## EDUCATION

---

### Uppsala University

*Masters in engineering, IT sociotechnical systems*

Uppsala

*Aug 2015 — July 2021*

## WORK EXPERIENCE

---

### Founding Engineer

Normain AB

- Inventing Extractional AI

Aug. 2025 — Current

*Stockholm, Sweden*

### Software Engineer

Mentimeter AB

- Maintained and developed enterprise features in the Mentimeter platform
- Played a big role in translating the Mentimeter platform, providing guidance and developed AI tools for other developers to increase their efficiency

Jan. 2025 — Aug. 2025

*Stockholm, Sweden*

### Project Lead & Backend Developer

Mevisio AB (Netlight)

- Built a customer excellence tool for improved data analysis and insights.
- Created a knowledge hub to enhance developer experience and streamline operations.
- Contributed to the Mevisio Platform by implementing new features and technical improvements, driving platform growth.
- Cut CI/CD pipeline time by 75%, speeding up deployments and boosting efficiency.
- Managed Kubernetes manifests across environments, supporting 14,000+ global users.

Jan. 2023 — Jan. 2025

*Stockholm, Sweden*

### Backend Developer & DevOps Engineer, Tech Lead

ABC Labs AB (Netlight)

- Built three LIMS and healthcare integrations to automate orders and result reporting.
- Boosted lab efficiency by automating tasks and adding sanity checks to reduce errors and speed up turnaround.
- Designed an event-driven system using Nest.js and Kafka. This architecture ensured data integrity and system scalability.
- Created and managed Kubernetes manifests for staging and production environments.
- Mentored new developers, conducted interviews, and provided technical support for stakeholders.

July. 2021 — Jan. 2023

*Stockholm, Sweden*

### Software Engineer

Sun Labs Nordic AB (Devcomp AB)

- Led the migration of a React web application to a React Native mobile app, enabling access to native features like the camera and notifications.
- Implemented key features such as push notifications and QR code scanning to enhance user experience.

July. 2020 — Mar. 2021

*Uppsala, Sweden*

### Software Engineer

Wines We Want SARL (Devcomp AB)

- Migrated a web shop from a monolithic PHP backend to a modular frontend/backend architecture.

Apr. 2020 — Dec. 2020

*Stockholm, Sweden*

### Software Engineer

Prorenata AB

- Integrated Playwright for end-to-end testing, improving CI/CD reliability and enabling test-driven development.
- Collaborated with the frontend lead and QA team to deliver tailored test automation solutions.

Jul. 2020 — Dec. 2020

*Stockholm, Sweden*

### Software Engineer

Cepheid AB

- Upgraded the C360 system by migrating to the latest Angular version and integrating with a Java Spring Boot API.
- Recognized for strong collaboration, proactive mindset, and effective knowledge sharing across teams.

Feb. 2020 — Jul. 2020

*Stockholm, Sweden*

## SKILLS

---

- **Programming Languages:** JavaScript, Typescript, Kotlin, HTML/CSS, Java, Flutter, Dart, Terraform, Rust, Ruby
- **Technologies:** AWS, React, Vue, Kafka, GCE, CQRS, gRPC, Websockets, Postgres, OIDC, Rest API, Docker, Kubernetes, Node.js, RabbitMQ, Redis, Terraform, Github, JIRA, React Native, Solid, Angular, Deno, Cloudflare

## PROJECTS

---

### Neon Programming language

[github.com/redsuperbat/neon](https://github.com/redsuperbat/neon)

Expression based language written in rust

### Rustproof

[github.com/redsuperbat/rustproof](https://github.com/redsuperbat/rustproof)

Spellchecker utilizing the language server protocol to spell-check code
